

Providing Affordable, Effective Communications Solutions

2sms Pager Replacement

The 2sms SNPP Paging solution bridges existing internal paging applications to the SMS messaging network. This allows a company to seamlessly transition from pagers to wireless handsets without altering their existing paging application.

Benefits

The 2sms SNPP Paging solution allows you to send pager messages to 2sms, which will be converted to SMS text messages and delivered to GSM and CDMA mobile handsets. This allows customers to replace their paging devices without having to alter their internal paging applications.

Why Replace Pagers | Paging systems and networks are becoming scarce throughout the world. While the ability to acquire new equipment and maintain old systems dwindles, there may still be a necessity to keep those systems in place. It is cost prohibitive to retrain personnel and acquire new systems. The 2sms SNPP Paging Solution allows you to simply swap out your existing pager provider for instant conversion to cell phone delivery.

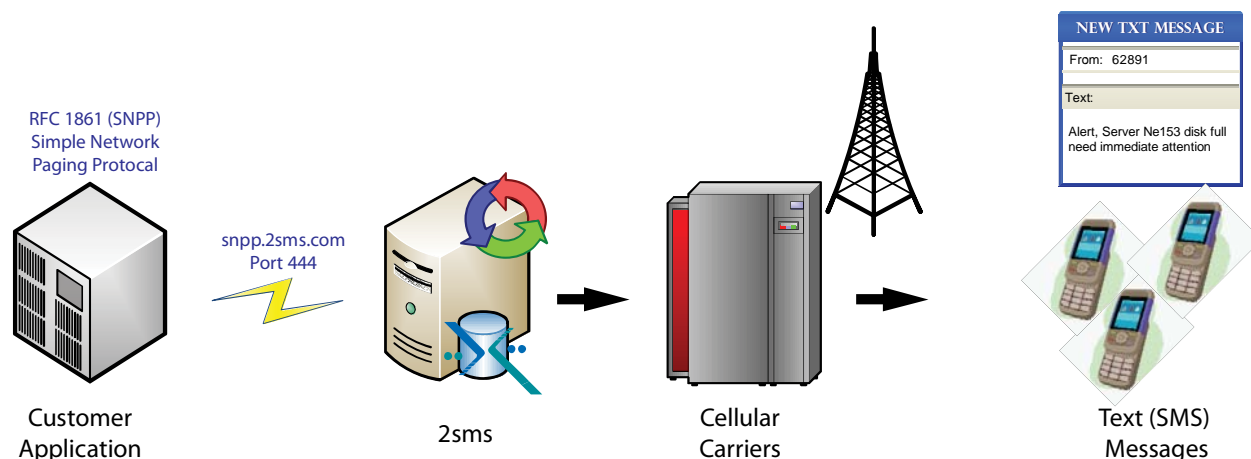

2sms SNPP Paging Solution Capabilities

- Messages can be sent to one or more mobile devices
- Messages can be sent to any cell phone or mobile device that is SMS capable
- Messages can be delivered domestically or internationally
- Messages and service are not carrier specific

2sms SNPP Paging Solution Benefits

- Requires no extra hardware
- Requires no new programming
- Connects to all wireless carriers and wireless handsets

Pager Replacement Workflow
