

Providing Affordable, Effective Communications Solutions

Headers

Sybase 365 enables customers to choose a unique custom header to use on their accounts. Instead of messages coming from '2010020', they will be headed with a title of their choice such as 'my_business'.

Benefits

Headers allow business customers to send out messages from a unique name. This helps recipients to instantly recognise who send the message, ensuring validity of the text.

Headers

- Headers are unique to you
- Choose any phrase or name between 3 and 11 characters with no spaces
- Only one time setup - the header is yours for life

Your header can be placed on as many accounts as you require.

The cost is a one-off fee, and is not subject to any annual renewal. This header is unique to you and cannot be used by anyone else - similar to a domain name.

Pricing
